Bank Open House Largely Attended

★ ★ ★

More than 2,000 visitors attended open house at the Collin County National Bank Saturday afternoon between the hours of 3 and 7 o'clock.

Bank directors, officers and employes were on hand to welcome their guests, and escort them through the modern building. Refreshments were served in the Community Room with the employes alternating at the punch bowl and coffee service.

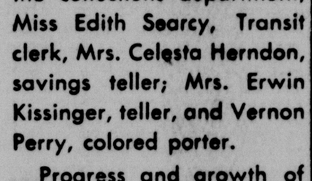
Souvenirs of billfolds for the men and ballpoint pencils for the ladies were given each guest.

Highlight of the afternoon was announcing the winner of the clock radio, following a three week's guessing contest. Two winners were presented gifts, having tied in contest. The crystal sphere, filled with an assortment of coins and currency valued at $334.50 had created much interest, and some 2,000 persons had registered their guesses during the contest.

The winners were Mrs. J. Ed Gibson of McKinney and Mrs. E. C. Barry of Forest Grove, each guessing $335.

The bank was a bower of flowers, with bouquets and arrangements adorning the spacious lobby, and Community Room. The profusion of beautiful blossoms were gifts from business firms, banks and friends not only in Mckinney from throughout North Texas. On Sunday some of these bouquets were sent to 24 local churches.

Occasion for the open house was to celebrate the 75th anniversary of this banking institution. The bank, oldest in Collin County, was chartered Apri 2, 1883, and has since continued as one of the outstanding financial institutions of this section of the state. In 1956 the bank constructed a modern building, adding many facilities to further their service to the people of McKinney and Collin County, and emphasize their allegiance to the property and future growth of the community.



▶ TEN EMPLOYES of the Collin County National Bank were awarded for their years of faithful service to the institution at a bank party Friday afternoon. At that time service pins, representing ten to forty years service, were presented by Gibson Caldwell, chairman of the Board. The combined service of the ten employes thus honored, was 270 years.

The party, given by Directors of the bank, was a complete surprise to the employes, held on the eve of the bank's open house which celebrated its 75th birthday.

Directors, officers and employes were invited to the Community Room for the informal occasion.

Those receiving pins were Erwin L. Kissinger, executive vice president; Newton J. Burkett, vice president; Miss Madeline Moses, cashier; U. S. Arrington and Glenn Long, assistant vice presidents; Mrs. Avo Hutchins of the collections department; Miss Edith Searcy, Transit clerk, Mrs. Celesta Herndon, savings teller; Mrs. Erwin Kissinger, teller, and Vernon Perry, colored porter.

Progress and growth of Collin County's oldest bank into one of North Texas' outstanding banking institutions is attributed much to the loyalty and conscientious endeavors of those employes thus honored.

▶ SEE DOWN in Athens, Texas, where the population is about 9,000 they will have a police force of five men according to the new Mayor. The old police force was fired because as the Mayor put it, "They were too strict on enforcing the law and that they gave too many tickets. Said the new Mayor, they could save money by having a smaller police force and the money could be used on street repairs. Now we are not going to attempt to tell Hizzoner, the Mayor of Athens, how to run that fine town but Your Home Towners believe that a well manned police force is a very vital part of a city's operation. Now our streets in Big McK. are in a heck of a shape but at least we gotta a bond issue put over and we hope work will start soon on gettin' the chug holes filled up.

Collin Towns "Over Top" In Red Cross Drive

Even though Mr. and Mrs. O. C. Dilehay have been out of the area for a greater part of March, this absence has not deterred them from raising their Red Cross Fund quota, in fact, they have exceeded their goal by $11.75. This couple is to be congratulated for the fine work they have done.

Earl Jones of Lucas also exceeded the fund quota for his community. Lucas had a $35.00 quota and raised $42.80. This shows good planning and hard work on the part of chairmen and interest on the part of contributors and proves that people will contribute to the Red Cross if given the opportunity.

Anna, with a quota of $260.00 is over the top with a total to date of $295.00. Earl Powell is the 1958 fund chairman for Anna and the results of his excellent organization has paid off in exceeding the quota by a good margin. Mr. Powell and the people of Anna are to be congratulated.

This year the Red Cross drive is progressing nicely and the fund chairmen and their assistants are working hard to reach the goals asigned to their towns. Enthusiasm, sufficient workers to do the canvassing, prior planning and hard work will mean a successful drive in any community and it appears the county will have a successful drive this year. Several towns have already raised funds in the October United or Combined Community Drives, namely McKinney with $7,000.00; Frisco, $475.00; Plano, $1,320.00; Prosper $300.00; Princeton $435.; Wylie, $525.00.

Other reports from towns this year are: Most of these are complete in their drive:

Blue Ridge, $170.95 incomplete.
Allen, $77.95 incomplete.
Weston, $80.85 incomplete.
Parker, $36.75 complete.
Lucas, $42.80 complete.
Winningkoff, $26.50 complete.
Forest Grove, $26.50 complete.
Christmasville, $109.25 complete.

Farmersville, with Rayford Jackson as chairman, conducted a one day campaign on March 25th and according to reports from Farmersville, with many chairmen still working on their assignments, it appears that Farmersville will go over the top this year as is customary for that town. The workers were enthusiastic and turned out 50 or more strong on March 25th to conduct a fast campaign, which we know will be highly successful when all the reports are received by Mr. Jackson.

New Hospital Near Completion

★ ★ ★

The McKinney City Hospital was organized in 1920, and operated for many years with a staff of about fifteen people who were caring for an average daily census of about ten patients. The monthly payroll exceeded $1500.00. In 1942 the hospital bed capacity was increased to 65, and due to financial difficulty the County of Collin joined the city of McKinney in support of the hospital in 1947. From that time on patronage of the hospital has increased, so that now it has an average daily census of about 50 patients, requiring the services of 108 employees with a monthly payroll of $22,000.00.

City-County Hospital will be closed in June of this year and the New Collin Memorial Hospital of 100 beds will be opened. The increased services and bed capacity will need a staff of about 130 people in the beginning, who will be paid about $30,000.00 per month to care for an anticipated average daily census of about 65 people the first year or two of operation.

The hospital sells service to the sick and injured of our area, no personal property changes hands in the hospital operation. No institution in Collin County renders more valuable service to our people. Good health is the basic foundation of all other business and social activities.

Hospital management and personnel at City-County Hospital are dedicated to the principels of relieving suffering humanity and to the restoration of the individual to his accustomed health and place in society. The opening of Collin Memorial Hospital will see a rededication of all people concerned, to these basic principles.

Tornado Warning System Set Up In McKinney

▶ FOR THE benefit of citizens of McKinney, a tornado warning system is set up with the Fire Department here. It will be the same as last year. Three short signals on big siren only on a confirmed funnel headed for McKinney.

This is the only type of warning system we have. The Police Department, along with the fire department, asks citizens to please not call the Fire Departmen—telephone for fire only—and please do not call Police Department telephone and tie up the phones, as our patrolmen are tracing the funnel and make their contacts to the City Hall by telephone.

Remember the siren will not sound except when a confirmed funnel is sighted and heading toward McKinney. To keep posted on news, it is recommended to keep your radio tuned to stations in this area.—By Order of Fire Chief Bennie Love.

Civil Defense Committee Gives Safety Rules

The Civil Defense Committee, composed of Civil Defense chairmen of local P-TA units, is sending a list of rules to parents, to prevent confusion in case of tornadoes, violent windstorms, or disasters in this vicinity. These rules will contribute to the safety of school children.

School principals, cooperating with the local Civil Defense Committee, endorse the plan and are assisting in carrying it out.

The letter sent to each parents, is as follows:

DEAR PARENT:

The Civil Defense Committee, composed of Civil Defense chairmen of each P-TA unit, submit to you, in the interest of your children, a few rules which we feel will prevent confusion, and contribute greatly to your child's safety. In this instance, this Civil Defense Organization is primarily concerned with natural disasters, that is, tornadoes, violent windstorms, etc.

In addition to this general plan [illegible] to all the schools, your local P-TA will give you specific instructions and suggestions which will apply to your local problems in your local schools.

The first general suggestion is that during all days on which tornadoes are suspected or forecasted, tune your radio to station KMAE here in McKinney for the purpose of learning whether or not it has been advisable for the schools to close. If there is no announcement, the schools will remain in session.

In conjunction with this, there is a short-wave radio receiver in the office of the superintendent of schools. That office can receive short-wave signals of local police tornado watchers and will know weather conditions at all times.

In all probability, your child or children, will be safer at school than at home. However, many parents want their children with them when windstorms or tornadoes are near, and the following are procedures which should be observed:

I.
Procedure for Contacting Your Child in School.

1. Your child will not be permitted to telephone you. It will be impossible for such permission to be granted because it would, if granted, lead to much confusion, and a complete disruption of classes.

2. If you want to get your child out of school, phone the principal's office, or go by his office and ask him to get your child. DO NOT, please, go directly to the classroom and take your child, because such action will usually cause fear in the others who are to remain.

3. If you take another child other than your own, it is your duty to contact its parents immediately, and the child is your responsibility until he is safely with his parents.

II.
Children Left at School

1. There will be teachers present and in attendance with your children until the danger has passed.

2. If the danger persists any length of time, then the teachers will remain with your children you or your representative call for them.

We sincerely hope there will be no occasion arise that will require the closing of schools. However, we feel you should know our method of operation so you will feel more secure with the knowledge of how the safety of your child will be handled.

SEW YOUR OWN GARMENTS.

Do you have special fitting problems—a Slim clothing budgets? Do you get real satisfaction from sewing for yourself and others?

If the answers are yes, you may want to join the increasing number of women who are making garments for themselves, and other family members.

The "homemade look" can be avoided by careful construction and pressing. The custom-made look requires patience, accuracy, attention to detail of finishes and good pressing. A job well done pays off with economy, fit and satisfaction.

If you are a beginner in sewing, choose a simple garment for your first try. A pattern of few pieces with simple design, and a fabric of good quality in solid color will give best results.

The pattern, fabric and the binding should be selected together for harmony. Figure type and purpose of the garment also influence pattern and fabric selection.

Bulletins prepared by extension specialists, give detailed instructions and pictures of different processes used in sewing garments. Get a copy of bulltins from your local county home demonstration agent's office.

Chamber of Commerce . . . CORNER

By PAT SIMPSON, Manager

A friend was telling us of a sign he noticed at the edge of a certain town. The sign read: "5913 friendly people and a few old soreheads live here." This is typical of most towns . . . only a small percentage of the population can be classed as soreheads. If we are not careful in passing judgment on a community we classify it by the contacts we have with the few soreheads . . . because it is the trials and unpleasant things in life that form the deepest impression on our minds.

The interesting thing about this above mentioned sign was the addition at the bottom saying: "Even us old soreheads welcome you." That is the way it is in McKinney, Texas . . . even us old soreheads are glad to have our visitors and are glad to have anything that will make of community a better place inn which to live and do business . . . even though this certain few of us maintain we have the right to remain soreheads if we choose.

We were in company with the president of our Chamber Wednesday, April 2, when we noticed a gentleman and his wife parking their car at a meter. Noting the Oklahoma license plate, we extended the greetings of our city. They were on their way to San Antonio; were favorably impressed with our town and had enjoyed their visit here. The man stated he had traveled extensively and found the majority of the people in every community to be good people.

Some few people living in our midst continue to think McKinney is not a good community and has many weaknesses. To prove this is a fallacy, our good friend, Jim Saunders, manager of the Southwestern Bell Telephone Company, says McKinney is the finest town and has the most friendly people of any community he has known. Before coming to McKinney, our good friend Jim was informed that McKinney was a hard town in which to get acquainted and make friends. Jim has found this very misleading. He and his family have become part of one of our fine churches; they are taking part in youth work; they are part of the Chamber of Commerce and Jaycees; have affiliated with a good service club, and have made many friends. Jim hopes he will be in McKinney a long time and we hope so, too. We hope that many more people with his attitude toward life will come to our community and give McKinney folks a chance to prove that we are a friendly community.

HINTS OFFERED ON CONTROLLING WEEDS AND GRASS IN COTTON

The second highest cost item in cotton production is far grass and weed control. Fred C. Elliott, extension cotton specialist, says on the average, 10 hours of labor are required an acre for this one item. But, he adds, this figure can be reduced if recommended control practices are followed.

Last year the State's cotton producers saved an estimated $16,000,000 by using rotary hoes, chemicals and oils in their efforts to keep weeds and grass under control. Rotary hoes on 44,798 farm tractors were used in 150 counties to cut more than $15 million from the hoe bill. Elliott points out that rotary hoe equipped tractors should be operated at high speed for best results, around 6 miles an hour.

Lateral oiling with five gallons of naphtha an acre was used on 21,000 acres in 53 counties to cut the weed and grass control cost by $65,000, reports Elliott. The cost of application was $1.00 an acre and oiling shoes with a gage wheel arrangement permitted the operators to travel at fourth gear speeds.

In one county, five gallons of naphtha an acre was applied as a fine spray on grass in the drill with 95 percent of the grass killed. This treatment cost a dollar an acre; eliminated hoeing and saved the producers a gross of $7 an acre.

Spot-treatment of Johnsongrass, says the specialist, can eliminate the pest in one year while a full crop can be produced on the treated acreage.

Elliott advises cotton producers who would like detailed information on the recommended weed and grass control practices to contact their local county agent for the desired information.

LIVESTOCK TREND REVERSES

Adequate rainfall along with more favorable prices has halted the downward trend in livestock numbers in Texas, according to Alvin Wooten, extension economist.

All livestock and poultry on farms and ranches were valued at $983 million at the beginning of the year, or 58 percent above the $623 million inventory value a year earlier. This sharp increase in value is a reflection of both the increased prices and numbers.

The total number of cattle and calves on Texas farms and ranches January 1, 1958, was estimated at 7.7 million head. This is the same as a year earlier but 9 per cent below the 1947-56 average of 8.5 million head.

The number of sheep on the same date was estimated at 4.7 million head—a five percent increase over a year earlier. This is the first significant increase in inventory in a number of years. In spite of a much smaller lamb crop, the number of ewe lambs held was 30 percent above a year earlier.

There weer an estimated 908,000 hogs on Texas farms on January 1, 1958. This was four percent below last year and 36 percent below the 1947-56 average. The higher prices for beef at retail should give some strength to hog prices in the fall of 1958 and kep them from faling to an abnormally low level.

On a nationwide basis, cattle numbers showed a decrease of one percent, sheep increased three percent, and hogs were about the same, though the number of sows and gilts on farms were up about five percent.

By NORMAN SCOTT

The McKinney Lions walloped the Carrollton Lions, 11-1, Saturday afternoon at Richardson for the championship of the Richardson Invitational Baseball Tournament.

◆ ◆ ◆

BIG FIRST INNING.

McKinney sent six runners across the plate in the bottom of the first inning to take a commanding lead and coasted the rest of the way behind the air-tight pitching of Tommy Lane. The Lions took advantage of four walks and an errr plus a sacrifice and three base hits for their six tallies. Doubles by right-fielder Richard Simmons and Lane highlighted the inning.

They increased their margin to 8-0 in the second frame by scoring two more featured by a single by catcher Jerry Hall and a two-bagger by shortstop Don Jenkins.

JENKINS CLOUTS HOMER.

After one out in the third, and with third-baseman Don Holmes and Hall on base via a walk and an error, Jenkins connected for a three-run round-tripper to give the McKinney nine a 11-0 lead. Carrollton scored an unearned run in the top of the fifth and the game was stopped due to the 10-run lead rule.

Lane, who allowed only a scratch infield hit, and struck out six, chalked up his fifth win of the season and the Lions' seventh in eight non-conference games.

SENATOR RAY ROBERTS

Ray Roberts, State Senator, 9th District, has authorized this paper to make his formal announcement for re-election to a second term, subject to the Democratic Primary.

In making his announcement, Senator Roberts said: "I am deeply grateful for the opportunity and privilege of representing the citizens of the 9th District in the Senate of Texas. I hope that the experience gained in my first term will give the district greater influence in state affairs during the next Legislature."

"I will conduct an active campaign in each of the seven counties in the 9th District, and I solicit your vote, influence and active support."

Roberts is a Navy Veteran of World War II and active in the Naval Reserve. He was called to active duty for a short period during the Korean conflict. He and Mrs. Roberts, the former Elizebeth Bush Kelly have one daughter in the University of Texas. When not in Austin, they reside in McKinney.

Senator Roberts has established an enviable record for his district. He has been particularly concerned with education, highways, agriculture and water problems. He was a member of the Texas Water Resources Committee which planned for many of the measures which became a part of the state-wide water program. As Vice Chairman of the Senate Water and Conservation Committee, he helped pilot them through the Senate.

He served as Chairman of the Veterans Affairs Committee, and member of the Insurance and Finance Committees. He was selected from the Finance Committee as a member of the Free Conference Committee on Appropriations, probably the most powerful committee of the Legislature. While on this committee, he authored the Uniform Classification Act designed to eliminate favoritism among state department employees and correct pay inequities.

LETTERS FROM . . . THE PEOPLE

Tom Perkins and
Mrs. Frances Stogdill,
Courier-Gazette Daily,
216 North Tennessee Street,
McKinney, Texas.

Dear Mr. Perkins and Mrs. Stogdill:

The Collin County Tuberculosis Association acknowledges its appreciation of your loyal support and wholehearted cooperation given the X-ray Survey and Christmas Seal sale. Only through the publicity you gave the Association can we put over so large a project like the X-ray Survey and Christmas Seal sale. During the survey, there were 5,001 X-rays given in Collin County: McKinney, 3,344; Plano, 760; Farmersville, 897; out of this total were 121 abnormal findings (this does not represent TB alone).

We have just closed our yearbooks for the Seal Sale and so please, with an increase from that of last year, the totals are as follows: 1957 sale, $2,043.10; 1956 sale, $1,840.40. We feel your help through your paper helped make this possible.

Again may we say thanks for your support and give you our sincere appreciation for the publicity given the TB Association. Hoping we may call on your services aagin.

Cordially,
CHESTER G. HAYS
President.

Miss Beth Taylor, student in NTSC, Denton, was home for the Easter vacation. She is the daughter of Mr. and Mrs. John R. Taylor.

COLLIN MAN COMMANDS 322ND AIR DIVISION

OIS, HQ. 322ND AIR DIV., EVREAUX, France, 11 March 1958 — Pointing to a rose-studded figure four, symbolizing the fourth anniversary of the 322nd Air Division, Col. Clyde Box, commander, comments on some amusing aspects of the Air Transport business. Following a short talk in which Colonel Box marked the remarkable growth of the division, he cut the anniversary cake with a ceremonial sword reputedly to have at one time, belonged to Napoleon. Over one hundred officers and their ladies attended the dinner at the Evreaux Officer's Club. Left to right are: Colonel Box, Col. Tarleton H. Watkins, division deputy commander; Mrs. Box, Mrs. Watkins, Col. Robert D. Forman, commander, 317th Troop Carrier Wing, Evreux, Mrs. Forman, Mrs. Churchill and Col. Randolph E. Churchill, Commander, 60th Troop Carrier Wing of Dreux, France.

Clyde Box was born February 2, 1912 in Nevada, Collin County, Texas, the sixth of eight children born to Michael and Myrtle Box. As a youth, Box attended primary and high schools in Nevada, graduating from the latter in 1929. Following graduation he attended North Texas State College at Denton, Texas, where he pursued a course in pre-medicine.

Receiving an Aviation Cadet appointment in 1936, he entered flying training at Randolph Field, Texas. After finishing advance flying school in 1937 at Kelly Field, Texas, he was awarded the wings of a pilot and commissioned a second lieutenant in the U.S. Army Air Corps.

His first assignment was at March Field, California as a flying officer with the 17th Attack Group. Shortly thereafter, he was assigned as assistant squadron operations officer and subsequently as operations officer. In 1940 he was assigned to the now famous 19th Bomb Group to fly the B-17 "Flying Fortress." In mid 1941, he was tranferred to the Ferrying Command at Long Beech, Calif., from where he ferried U.S. Air Force planes to Canada. In September, 1941, he rejoined the 19th at Albuquerque, N. Mex., shortly before leaving for the Philippines.

When the Japanese attacked Clark Field, Colonel Box was a squadron operations officer. On Christmas day he withdrew to Bataan and on December 29, sailed to Mindanao under cover of drakness. In a patched up B-18, he, with other officers, flew to Darwin, Australia and then to Java. While he was assisting in surveying airdromes in China, India and Burma, to determine the feasibility of counter attacks against Japan, Java fell and his unit moved to India where it became the 10th Air Force.

The following year, he was assigned as deputy chief of staff for for the newly activated 10th Air Force in New Dehli, India. While here, he assisted in early surveys for the initiation of "The Hump" operation. Little Elm Baptists Have Anniversary

The Little Elm Baptist Church recently celebrated the third anniversary of the new church building when the Methodist congregation joined with them in the observance. Rev. Al Murdock, senior at NTSC, Denton, took over the pastorate of the church in 1954 and was the speaker for the morning worship.

At noon dinner was served in the school cafeteria. A large number of former members and friends attended.

A sing-song was held in the afternoon with visiting singers as well as local talent.

The Rev. Murdock and his members selected the new site for the new church when the formation of Garza-Little Elm Reservoir was in the planning stage. Now the old church grounds are under several feet of water.

The government paid $8,000 for the old church site and with donations largely from the members, the church was built without going in debt. A lot of the interior work was done by members working at night.

The only things the congregations has been unable to complete are the plumbing and provision of adequate furniture.

The brick structure has seven rooms, the auditorium, and kitchen.
